25 March 1958

MEMORANDUM FOR: Project Director

**SUBJECT : URPIC-2 Reporting in Connection with
ROBINHOOD**

1. After consultation with the NSA representative, AFCIN representatives, and the Project Intelligence Officer, the following arrangements have been agreed for transmittal to Headquarters and lateral reporting in the field of the PI reports prepared at [Redacted] hereafter referred to as URPIC-2 reports.

25X1

25X1

2. AFCIN will instruct its Commander URPIC-2 at [Redacted] to transmit through SSO channels:

25X1

a. Promptly and directly to Air Force Headquarters Washington the URPIC-2 report. Upon receipt of the URPIC report, AFCIN will relay the report by wire to the Office of Current Intelligence Watch Officer for dissemination to Ad Hoc Requirements Committee participants as hitherto in past URPIC reporting.

b. The URPIC-2 report to Fifth Air Force with lateral dissemination in keeping with other agency wishes as follows:

1) USARISC.

2) [Redacted]

25X1

3) COMNAVPAC, Japan.

c. The URPIC-2 report simultaneously with b above to PACAF with slugs for lateral dissemination to USARPAC, CINCPAC, CINCPAC Fleet, and [Redacted]

25X1

d. The URPIC-2 report directly to COMSEVENTHFLT.

3. The messages cited above from b to d will be transmitted as soon as possible after the message indicated in a.

4. All messages will begin: "THIS IS AN URPIC-2 REPORT" with, in the case of b and c, indication for lateral dissemination as stated, classification TOP SECRET NOFORN limited distribution. CIA representative  will advise the Commander URPIC-2 with regard to standard sanitization procedures hitherto routine in URPIC reporting from URPIC-1 and URPIC-W.

25X1

5. It may be that in the judgment of the Commander URPIC-2 highly significant information of timely interest may be transmitted on a flash basis through the channels outlined in paragraph 2 a without awaiting the completion of the FI.

6. Advices from HDAUTOMAT in terms of community needs for FI work will be transmitted through AFCIN to Commander URPIC-2. Interrogations from the Commander to Headquarters destined for either AFCIN or HDAUTOMAT will be transmitted from him to AFCIN.

7. Air Force is currently making arrangements to send an ELINT operator to make a preliminary audio read-out of System One if used. Reports of his read-out will be disseminated as indicated only in paragraph 2 a above. (The analyst in question will not be given the track but will simply note this signals and the time at which they appear on the track. This information in the hands of Washington Headquarters when joined with the track will be of some use.)

8. It should be noted that the arrangement to the use of the communications arrangements indicated above was based on the fact that it was much easier to use this channel in as secure a fashion as through the use of the
